Skills

Programming & Querying: SQL, Python

Languages

English & Hindi

Projects

Ecommerce Application | *Python*   **September 2025**

- Developed a full-stack e-commerce web application integrating a React-based frontend with a Node.js/Express or Spring Boot backend API.
- Designed and implemented RESTful APIs for customer management, product catalog, and order processing using MongoDB as the NoSQL database.
- Configured environment variables and managed package dependencies efficiently for consistent development and production environments.

Certifications

- **Programming Data Structures and Algorithms using Python Certificate - NPTEL (2024)**
- **Databases and SQL for Data Science with Python - Coursera (2024)**
- **Probability Statistics for Machine Learning Data Science - Coursera (2024)**

Education

B.E. Computer Science Engineering   **2023-2027**

The National Institute of Engineering, Mysuru   *CGPA: 8.5 / 10*
