

Piyush Raj

DOB: 08-08-2003 — +91-9569924932 — prajindia012@gmail.com — linkedin.com/in/piyush-raj-902295253 — github.com/PIYUSHRAJ012

Education

The National Institute Of Engineering

B.E. in Computer Science & Engineering, GPA: 8.585/10

Mysore, Karnataka

August 2023 – July 2027

Khelgaon Public School

Higher Secondary Certificate (Science with Computer Science)

Prayagraj, Uttar Pradesh

August 2020 – July 2022

Projects

- **Secure Image Steganography System** – *Python, Flask, Cryptography, NumPy, Pillow* – GitHub
 - Developed a secure image steganography web application to hide encrypted text and images inside digital images using the Least Significant Bit (LSB) technique.
 - Implemented password-based encryption using PBKDF2 and SHA-256 with AES-based Fernet encryption.
 - Designed randomized pixel embedding using password-derived seeds to improve resistance against steganalysis and unauthorized extraction.
 - Evaluated embedding performance using image quality metrics such as MSE, PSNR, payload capacity, and RGB histogram comparison.
 - Built an interactive Flask interface supporting secure embedding, extraction, and downloadable stego images.
- **Retail Sales Analysis Using SQL** – *MySQL, SQL, ETL, Git* – GitHub
 - Designed and implemented a normalized MySQL database with 4 relational tables (**Customers**, **Products**, **Orders**, and **Order_Items**) using the Sample Superstore dataset.
 - Built an ETL pipeline using a staging table to transform and load 9,994 retail sales records while maintaining data integrity through validation and reconciliation.
 - Developed 30+ SQL queries using joins, aggregate functions, CTEs, window functions, and views to analyze sales trends, customer behavior, product performance, and regional profitability.
 - Generated business insights including monthly sales trends, top-performing customers and products, customer segmentation, and profit analysis to support data-driven decision-making.
- **Amazon Frontend Clone** – *HTML, CSS* – GitHub
 - Developed a responsive frontend clone of the Amazon homepage using HTML and CSS to replicate a real-world e-commerce user interface.
 - Designed key UI components including navigation bar, search section, product categories, hero banners, shopping panels, and footer layout.
 - Utilized CSS Flexbox and layout styling techniques to create structured, visually consistent, and user-friendly webpage sections.
 - Improved frontend development skills through component-based section organization, styling optimization, and responsive web design practices.

Technical Skills

Programming Languages: Python, SQL

Web Technologies: HTML, CSS

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Pillow, Cryptography

Tools & Platforms: Git, GitHub, VS Code

Databases: MySQL

Core Subjects: Data Structures & Algorithms, OOP, Database Management Systems, Operating Systems, Computer Networks

Certifications

- **Google Data Analytics Professional Certificate** – Coursera (Google) Feb 2026
Completed training in data cleaning, visualization, SQL, spreadsheets, and Python for data analysis.
Certificate Link
- **Programming, Data Structures and Algorithms using Python** – NPTEL (IIT Madras) July – Sep 2024
Elite certification focused on Python programming and core data structures & algorithms.
Certificate Link
